

WIG SIZE MEASUREMENT GUIDE

CIRCUMFERENCE

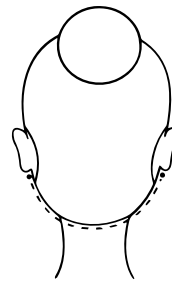

FRONT TO NAPE

EAR TO EAR ACROSS FOREHEAD

EAR TO EAR ACROSS TOP

NAPE TO NECK

TIPS FOR MEASURING THE WIG SIZE

Always hold the tape snug against the head but don't press it hard.

Do not tighten it around your head because then it won't give you the right measurement.

Keep the tape flat while measuring the head and don't ever let it twist around the head because that doesn't give you the right measurement too.

Measure it a few times before you make a conclusive decision on your head size.

Always use the fabric measuring tape. It will give you more accurate results.
